

# Hands-on Training on Fundamentals of Life Cycle Assessment (LCA)

## From Theory to Practice: Hands-on Software-Based LCA training

This hands-on course teaches you how to build and analyse LCA models using leading LCA software. Through structured, ISO methodology-aligned practical exercises, you will develop the skills needed to assess product environmental footprints or sustainability decision-making.

On demand

1 Day

Online or In-person

**This practice-oriented course focuses on the application of LCA using professional software tools and guided modelling tasks.**

### WHAT TO EXPECT

- Interactive practical sessions
- Group discussions
- Guided modelling tasks and readings

### SKILLS YOU'LL DEVELOP

- Life cycle thinking
- Practical proficiency with LCA modelling software
- Data analysis, LCA results interpretation and communication

**Prior Experience:** Introductory knowledge of LCA is useful but not essential
